THE FREEDOM will change your life
Safety Tubs®, the world leader and inventor of acrylic walk-in bathtubs, makes it easy to get in and out of the tub and enjoy the comfort of bathing. Everything about a Safety Tub® is designed to give you the freedom to bathe – on your own – in safety, comfort and convenience. Simply walk in, close the door and relax with a warm soak or a swirling whirlpool massage.

PEACE OF MIND comes from safe bathing
If safe and easy bathing is a concern to you and your loved ones, a Safety Tub® is perfect for you. Safety Tubs® universal design allows everyone in the family – including those experiencing age and mobility challenges – to enjoy safe, luxurious soaks and massages. The low entry, built-in handrail and slip-resistant tub floor are just a few features that make bathing safe with a Safety Tub®.

THE COMFORT alleviates aches and pains
Safety Tubs® are great for arthritis, rheumatism, back pain and other common aches and pains. You will notice a difference in how you feel after just one warm, deep soak or therapeutic massage. Used regularly, the Safety Tub® will literally transform your life.

Custom Fit Sizable Extension Kit
• Converts 51” tub to fit in spaces up to 70” in length
• Left hand or right hand installation
• Acrylic construction
• Works with 51” x 26” and 51” x 30” tub models: soakers, jet massage, air massage & dual massage
• Easy assembly
• Perfect fit

Fast Draining, No Waiting
The Minute Drain™ is a powered pump that evacuates water from our walk-in tubs faster than typical drains, which means you spend less time waiting. With Safety Tubs® Minute Drain™, you can walk out of the tub when you are ready.

Four Times Faster
Designed to work independently or together with the manual waste and overflow assembly; the Minute Drain™ is up to 4 times faster than conventional draining systems. And since this system ties into the manual waste and overflow and plugs directly into the wall (in the same way as the whirlpool pump), there is no additional plumbing required.

The Minute Drain™ is equipped with a pump, safety suction and on/off electronic control which allows you to activate the system with a touch of a button to quickly and completely drain your Safety Tub®.

Breakthrough Technology
Designed by our team of world class engineers, Safety Tubs® continues to revolutionize the industry with the introduction of this patent pending design that significantly enhances the walk-in tub bathing experience.

MODEL DRAIN™ FAST WATER REMOVAL SYSTEM ... walk out when you're ready.

• Works with 48” x 28” tub models: soakers, jet massage, air massage & dual massage
• Easy assembly
• Perfect fit
WHIRLPOOL OPTIONS

Turn your bath into a health spa

Once used only in health spas, warm whirlpool bath therapy is now a common and effective treatment for symptoms of arthritis, back pain and other common ailments. While soaking in warm water alone increases circulation and helps realize the relief of certain types of pain, the addition of the Premium Jet Massage and Five Star Air Bubble Massage systems increases the overall health benefits of a warm bath.

THE LATEST TECHNOLOGY
For a complete bathing experience

Jet Massage System™

The water will revive you

Tailor the effects of your whirlpool experience with the Deluxe Back Massage and Legs Only Massage systems to achieve a new level of comfort and results. The Legs Only Massage allows you to direct the flow of water solely to the well area of the tub to carefully massage your lower extremities. This feature enables you to fill the bottom half of the tub only for a quick leg bath.

The Deluxe Back Massage consists of multiple, strategically positioned jets for the most comfortable and therapeutic lower back massage available. Includes the self-cleaning sanitary system - Ozone.

Air Bubble Massage System™

Soothing your body and mind

The Five Star Air Bubble System sends thousands of air bubbles bouncing throughout the tub to create a soft, full-body champagne bath. Unlike most air systems, the Safety Tubs® Five Star Air Bubble System forces bubbles farther and deeper into the bathing area for the most complete, gentle massage. You’ll find yourself relaxing fully as you enjoy the sensation of a caressing skin massage.

Dual Massage System™

The ultimate body therapy

Perhaps you’ll prefer the light, soft bubbles of the Five Star Air Bubble System bath one day, and the invigorating hydrotherapy of the Premium Jet Massage system the next, or want to experience both at once. With the Dual Massage System, you can set the mood with a touch of a button by selecting either or both at once for the ultimate bathing experience. Includes: air-filled neck pillow and self-cleaning sanitary system - Ozone.

Chromotherapy

Healing with color and light

Color and light have been used for healing since the beginning of recorded history. Ancient Egyptians built solarium-type rooms with colored panes of glass for treating patients with various ailments. Safety Tubs® is proud to be the first manufacturer to offer color and light therapy for walk-in bathtubs. Our chromatherapy option features multicolored lights positioned in the basin of the tub that illuminate water and enhance your bathing experience.

Aromatherapy

Enjoy the mood

Combine hydrotherapy and aromatherapy for the ultimate in relaxation. Positioned on the deck of the tub, the aromatherapy system automatically distributes your choice of fragrances throughout your Safety Tub® while running the jet or air bubble massage systems. The starter kit contains four fragrances which can be replenished at local department stores.

Self-Cleaning Sanitary System (Ozone)

Eliminate the maintenance

Say “goodbye” to the maintenance needed to enjoy a clean whirlpool system. Approved by the USDA, FDA and EPA, Ozone is the most effective cleaning system available for bathing environments. Also used to treat drinking water and commercial bathing environments, this safe and effective sanitation system automatically oxidizes and eliminates disease causing microorganisms in the tub, plumbing and jets and does not require active user participation. Included with jet and dual massage system.

In-line Water Heater

Maintain your water temperature

No need to continuously add warm water to your bath. Designed for the jet and dual massage systems, the in-line heater from Safety Tubs® is automatically activated to maintain the water temperature longer so you can relax and enjoy the ultimate bathing experience.
REVOLUTIONARY PATENT PENDING DOOR SYSTEM
for safe, easy access
Safety Tubs® TS™ door system eliminates the need to step over the front of the tub and allows safe and effortless entry. Simply walk in, close the door and relax! No stepping or straining to get in or out of the tub.

WATERTIGHT DOOR SEAL
with a lifetime guarantee
Best of all, the TS™ door system will not warp, rust or leak. The watertight seal is guaranteed for life. It’s an ingenious solution that doesn’t need special care or maintenance.

PREMIUM BATH CONSTRUCTION
the best bathing materials
Safety Tubs® offers Acrylic and Solid Surface walk-in bathtub construction, a first for walk-in bathtubs that offer 17” chair height seats. These are the materials of choice for leading bathtub manufacturers and trade professionals across the country. Germ and stain resistant surfaces, better heat retaining properties and durability are just a few of the many benefits versus older, gel-coat fiberglass models.

SHOWER IN YOUR SAFETY TUB*
wall mounted or hand-held
Safety Tubs® faucet with hand-held shower allows you to convert your bathtub into an easy-to-use and attractive shower. Use it standing up or sitting down for peace of mind and security while bathing.

17” CHAIR HEIGHT BUILT-IN SEAT
for easy up and down
The built-in, contoured, chair height seat – standard in all Safety Tubs® – means you won’t find yourself struggling to get up or down. Safety Tubs® are nearly twice as deep as regular bathtubs so you’ll enjoy much more room to soak. Submerge yourself and enjoy a luxurious bathing experience.

BUILT-IN SAFETY BAR & SLIP RESISTANT FLOOR
for safety and convenience
The built-in safety bar and slip-resistant tub floor adds even more security and further increases your peace of mind. Every detail about the Safety Tub® is designed for your independence, safety, comfort and convenience.

ALWAYS FITS PERFECTLY
into all standard tub spaces
Safety Tubs® are designed to fit into all standard bathtub spaces. The versatile bath extender panel adjusts to fit your specific tub area, making new construction or remodel installations simple and hassle free.
